

Vancouver, BC August 4, 2007

BI Pure Water (Canada) Inc. of Port Kells (Surrey, BC) announces the design and supply of a water treatment plant for Elk Valley Coal Corporation (Teck Resources) at its Harmer site. Elk Valley Coal is the world's second largest exporter of metallurgical coal, producing 21% of the world's hard metallurgical coal for the international steel industry.

A 3-D drawing of the Elk Valley Coal Harmer water treatment plant.

This package water treatment system utilizes a self-cleaning disc filter, cartridge filtration, NSF certified R-Can Sterilight ultraviolet primary disinfection and chlorination for residual disinfection. A large treated water storage tank, inside the building, provides chlorine contact time and peak use water storage.

BI Pure Water specializes in reviewing water quality test results and prescribing the most cost-effective solution. BIPW Engineers pilot, design, manufacture, install, start-up and commission package water treatment plants. The operators are then trained and the plants can be serviced on a regular basis. BIPW focuses on small and medium-sized

water treatment plants to meet the needs of Federal, Provincial and Municipal Governments, Industrial Process, Private Water Systems, Resorts & First Nations.

BI Pure Water specializes in reviewing water quality test results and prescribing the most cost-effective solution. BIPW Engineers pilot, design, manufacture, install, start-up and commission package water treatment plants. The operators are then trained and the plants can be serviced on a regular basis. BIPW focuses on small and medium-sized water treatment plants to meet the needs of Federal, Provincial and Municipal Governments, Industrial Process, Private Water Systems, Resorts & First Nations.

BI Pure Water package water treatment plants are cost-effective because:

- The water treatment plants are custom Engineered to the specific water analysis.
- The plant can be built in the Port Kell's factory where the trained staff are located.
- Components & parts are readily available.
- The water treatment plant can be leak and flow tested.
- The PLC can be operated and debugged before shipping.
